Central Adelaide Local Health Network
Community Falls Prevention Service

The Falls Prevention Service Directory is an important resource for health professionals working with older adults who are at risk of falls. This directory aims to assist clinicians in linking consumers with the right services at the right time. It provides information on a range of falls prevention services.

The Importance of Falls prevention

Falls represent a common and significant problem, especially in our elderly population. Approximately 30 to 40% of community-dwelling older persons fall in Australia each year, resulting in significant mortality and morbidity, as well as increased fear of falling and restriction in physical activity.

Falls are the leading cause of injury related hospitalisation with statistics showing that in 2016, 21,120 people were admitted to a South Australian public hospital injured after a fall. About 65 percent of who were over 65. That figure is about ten times higher than the 1,927 people of all ages admitted to hospital for motor vehicle injuries.

Falls are not a normal part of ageing, however can occur for a number of reasons. These could include changes in health, muscle weakness, reduced balance, medications, reduced vision and hearing, weight loss, foot pain, poor foot wear and environmental hazards.

Falls can result in injury and reduced function which can have a major impact on the health and wellness of our community. A multidisciplinary approach to address falls risk factors has been shown to reduce the risk of falling.

The Central Adelaide Local Health Network (CALHN) Community Falls Prevention Service was established to provide comprehensive falls assessment through two multidisciplinary Falls Assessment Clinics. The service offers a triage and care coordination service for community living older persons who have experienced multiple and complex falls.

Central Adelaide Local Health Network

CALHN provides care for people living in the central metropolitan area of Adelaide as well as providing a number of state-wide services, and services to those in regional areas. Skilled staff provide high quality client care, education, research and health promoting services.

CALHN provides a range of acute and sub-acute health services for people of all ages and includes:

- Royal Adelaide Hospital
- The Queen Elizabeth Hospital
- Hampstead Rehabilitation Centre
- St Margaret’s Hospital
- Ambulatory and Primary Health Service
- Sub-Acute and Mental Health

Central Area Geriatric Services

- Geriatric Evaluation and Management Unit (TQEH)
- Community-based Older Persons Mental Health Service
- Inpatient acute care of older people services
- Inpatient Geriatric consultative services
- Falls Assessment clinics (TQEH and Sefton Park PHC)
- Multi-D Community Geriatric Service
- Transition Care Programme
- ACAT (Aged Care Assessment Team)

Disclaimer

This directory has been prepared by the Central Adelaide Local Health Networks Falls Prevention Teams for information purposes. The Falls Prevention Teams assume no responsibility for the information provided by any of these service providers, and disclaim all the liability in respect of such information.
Referral guide to falls prevention services for ≥65yo & ≥50yo ATSI

Triggers for referral
> Recent hospital admission, Emergency Department presentation or SA Ambulance Service callout for a fall
> Client reports having had a fall, trip or slip (with or without injury)
> Client appears unsteady
> Your clinical assessment reveals:
Falls risk factors: e.g. history of falls, multiple medical conditions, polypharmacy, psychotropic medications, unsteady gait, poor balance, reduced physical activity, sensory loss, cognitive changes, incontinence, weight loss, unsafe footwear, home environment hazards, decline in function
Increased risk of injury e.g. fracture history, osteoporosis, anticoagulation.

When determining a falls care plan, what service options are most suitable?
> Is a comprehensive falls risk assessment required?
> What is the level of urgency?
> What is the level of complexity?

Falls and injury risk factors

The consumer has few and simple risk factors
For example: reduced strength or wearing bifocals

The consumer has multiple risk factors
For example: reduced balance, foot care and home safety issues

The consumer is at high risk of falling and has a complex medical picture
For example: dizziness, polypharmacy, cognitive impairment, history of fragility fracture, poor vision and further tests/investigations required

Depending on consumer needs, consider:
- Education/ information (Falls fact sheets, Don’t Fall for It booklet)
- Strength for Life 50+
- Centre for Physical Activity in Ageing
- My Aged Care
- Private allied health providers & nursing
- Medicare allied health rebate schemes via GP
- Department of Veterans Affairs allied health & nursing via GP
- Consider intensification of current services or referrals via:
  - My Aged Care for
    - Allied health & nursing
    - Falls & balance programs
    - Occupational Therapy home safety assessment
    - Commonwealth Home Support Programme
  - Refer to low risk column for other strategies
  - These consumers will need further assessment & some coordination (consider GP support)

Refer to:
- Falls Assessment Clinic for geriatrician-led multidisciplinary assessment
- Outpatient geriatrician assessment via GP
- Metropolitan Referral Unit via GP for hospital avoidance services
- Multi-Disciplinary Community Geriatric Service

Not sure? For assistance in determining the appropriate service, refer to CALHN Community Falls Prevention Service on 8222 8867
Or Phone 1300 0 FALLS (1300 0 32557) to speak with your local falls team
What is a falls assessment clinic?
Falls assessment clinics provide specialised multidisciplinary assessments and management of older individuals living in the community who suffer complex falls related presentation. The service includes assessment by a geriatrician, physiotherapist, occupational therapist and nurse.

Cost
This is a free service.

Criteria for eligibility
- Lives in the Central Adelaide Local Health Network
- Client consents to referral
- Aged 65 or older
- Aboriginal and Torres Strait Islander aged 50 or older
- Multiple co-morbidities
- Has not had recent review by geriatrician or multidisciplinary team
- Does not have an acute fracture or acute illness (is medically stable)
- Has had two or more falls in the past 12 months or has had one fall with serious injury in the past 12 months

Note: permanent residents of aged care facilities are not eligible for this service

How do I refer to a falls clinic?
To refer to a falls clinic, use the Central Adelaide Local Health Networks Falls Assessment clinic referral form in page 6.

Community Therapy Services

Are funded through the Commonwealth Home Support Program. They provide services such as physiotherapy, occupational therapy, exercise physiology, social work and podiatry to older persons living in the community. Some services also specialise in speech therapy, dietetics, continence nurse advisors. These services may be provided individually or in groups. Services vary at each site.

They aim to provide:
- Rehabilitation
- Maintenance of function, independence, maximise skills and coping
- Prevention through health promotion and information.

Cost?
There is a cost to clients who receive services from an Allied Health Service provider. The fees are capped if multiple services are accessed from the same provider. Contact the service provider regarding the fee structure and costs. Some service providers may have a fee reduction or waiver process in place.

Who is eligible?
Individuals who are:
- Over 65 years of age and Aboriginal and Torres Strait Islander peoples over 50 years of age – some exceptions to this are possible
- Living in the community
- People seeking to maintain or help restore physical, cognitive and functional ability.

How do I refer?
All referrals for Allied Health Services are via the My Aged Care website www.myagedcare.gov.au or Contact Centre 1800 200 422.

Strength for Life

What is the Strength for Life Program?
Developed and governed by Council On The Ageing (COTA) SA, this program provides strength training sessions at multiple venues across metropolitan greater Adelaide.
The program provides:
- Supervised strength training sessions
- Minimum of two sessions per week
- Assessments for all clients by an appropriate fitness professional and a personalised program.

There are 2 Categories:
- Tier 1: Delivered by Exercise Physiologists or Physiotherapists
- Tier 2: Delivered by Fitness Instructors

Cost
Small fees do apply. Contact your local Strength for Life facility for costs. Rebates from health funds may apply.

Who is eligible?
Individuals over 50 years of age who are independent with mobility and transfers. Aboriginal and Torres Strait Islanders over 40 years.

How do I refer?
Health Professionals can refer to the program by completing the referral form accessed from website below. A list of current providers in, and around the Central metropolitan region is also in this directory. Clients can contact the chosen service provider to start their program. Transport is not provided.
For more information contact COTA SA

COTA SA
16 Hutt Street, Adelaide, SA 5001
Tel: (08) 8232 0422
Fax: (08) 8232 0433
Email: cotasa@cotasa.org.au
Web: www.cotasa.org.au
**Tai Chi**

Research shows that Tai Chi is one of the most effective exercises to help in the prevention of falls. It aims to improve balance and prevent further falls. The program will also improve relaxation, fitness and health.

**What is Tai Chi?**

Tai Chi originates from ancient China, originally developed as a Martial Art. Nowadays it is mainly practiced throughout the world as an effective exercise for health. The slow flowing Tai Chi movements improve muscle strength, balance and confidence as well as aiding relaxation and coordinating body and mind.

**Cost**

Small fees do apply; contact the individual instructor below for information.

**Who is eligible?**

Suitable for people who are independent with mobility and transfers and able to participate in a group class.

Tai Chi exercise is performed in standing and involves smooth flowing movements of arms, often co-ordinated with slow stepping and turning. Participants must be able to stand for several minutes unsupported, and be able to cope with narrowed base and slow stepping with co-ordination of arm movements. Unsuitable for people with moderate or severe balance difficulties.

**Finding a service**

There are various services throughout Adelaide who offer Tai Chi programs. These programs may be accessed through My Aged Care by phoning 1800 200 422 or visiting [www.myagedcare.gov.au](http://www.myagedcare.gov.au). Alternatively local councils (see page 25) & the National Health Service Directory [www.nhsd.com.au/](http://www.nhsd.com.au/) are great resources.
Centre for Physical Activity in Ageing

What is the Centre for Physical Activity in Ageing (CPAA)?

Established in 1981, the aim of the Centre for Physical Activity in Ageing (CPAA) is to contribute to the quality of life of individuals through the provision of specialised physical rehabilitation, health promotion, scientific research and educational programs.

Located at the Hampstead Rehabilitation Centre in Northfield, the CPAA provides a variety of programs supervised by exercise physiologists. An exercise physiologist will provide an assessment of all new clients and will then advise on the most appropriate exercise option.

Cost

Small fees do apply, please contact CPAA for costs. Programs include:

- exercise rehabilitation (hydrotherapy, gym or home-based exercise)
- chronic disease management
- better balance.

This service is suitable for clients who are at risk of falling or have fallen in the past. It consists of aerobic, strengthening and balance exercises. Program structures are dependent on the individual needs of each client and are supervised by an exercise physiologist. Home exercise programs are also provided to encourage participants to be active at home as well as in the gym.

Who is eligible?

Individuals over the age of 18.

How do I refer to the CPAA?

GPs can refer to the CPAA by completing a referral form. Please note that transport is not provided.

Private Falls Assessment and Prevention Program
Confident Steps Balance and Falls Prevention Program
Calvary Rehabilitation Hospital

What is it?
A goal directed 6 week program of exercise and education to improve balance, functional ability and decrease falls risk factors.
Prior to commencing the program, patients undergo an individualised assessment with a Rehabilitation Physician, Occupational Therapist and Physiotherapist. Goals are established and an individualised exercise program is provided. A home safety assessment is completed if required.

Cost
This service is generally covered by private health insurance or DVA funding, confirmed individually prior to booking. Excess or co-payment may apply, depending on patient’s insurance cover

Who is eligible?
Falls clinics are suited to individuals:
> who present with 4 or more co-morbidities, leading to a higher falls risk, or
> who report two or more falls in the past year and
> who do not have an acute fracture or acute illness (is medically stable).

How do I refer to this service?
A referral from a medical practitioner is required.
To obtain a copy of the referral form or more information contact:

Falls prevention support for the veteran community

Falls prevention services available through DVA were previously provided as part of the Homefront Program. This program ceased in February 2015, and changes to the Rehabilitation Appliance Program (RAP) have seen the inclusion of several falls prevention items in the program’s National Schedule of Equipment (the Schedule). These changes eliminated unnecessary duplication of assessments between the RAP and the Home Front programme.

Eligibility

If you are a Gold or White Card holder (with assessed need due to an accepted disability), you can access aids or appliances to help you maintain independence in your home through the Rehabilitation Appliances Program (RAP).

- Aids or appliances prescribed through the programme can include:
  - Continence products
  - Mobility and functional support aids
  - Personal Response Systems
  - Home medical oxygen
  - Diabetic supplies
  - Continuous Positive Airways Pressure (CPAP) supplies.

How to obtain an assessment for RAP aids or appliances

RAP appliances are available on the basis of an assessed clinical need made by an appropriately qualified health provider such as a:

- General practitioner
- Occupational therapist
- Physiotherapist
- Speech pathologist (speech therapist).

Your Local Medical Officer (GP) can provide the necessary referral to an appropriate allied health professional who can assess your need for RAP aids and appliances. Your GP can also offer advice and make requests in writing to DVA.

Home Modifications

In certain instances, DVA will fund home modifications for Gold or White Card holders (with assessed need due to an accepted disability) based upon their clinical need as assessed and prescribed by an appropriate health professional.

Further Information

For further information about DVA’s RAP program please call 133 254 (metro) or 1800 555 254 (country). You can visit the website at www.dva.gov.au
### Memorial Hospital Day Rehabilitation Unit

**Who is eligible?**
Outpatients, previous inpatients, DVA, workcover, and third party are all eligible. The full cost of rehabilitation is usually covered by the private health fund, DVA, WorkCover and third party.

**What services are offered?**
- Hydrotherapy
- Physiotherapy
- Occupational therapy
- Speech pathology
- Dietetics

**How do I refer to this service?**
A doctor’s referral is required. Doctors can refer by ringing (08) 8366 3419

Vision
The body relies on vision for balance and to prevent falls by assisting persons to
negotiate the environment safely. Vision falls risk factors include poor visual contrast
sensitivity, depth perception and acuity. Corrective lenses alone do not address all
these factors and some lenses may actually increase risk of falls. Therefore, it may be
important to have a comprehensive vision assessment, particularly if there is an
existing visual impairment.
The following services provide help for older people with a visual impairment who are
at risk of falling.

Low Vision Falls Prevention Service, Guide Dogs SA.NT

What is it?
A comprehensive vision assessment is provided by a Lower Vision Specialist and an
occupational therapist in the context of falls prevention.
Recommendations are made for home modifications, equipment, aids and practical
strategies to maximise use of residual vision and minimise falls risk. Referrals to
relevant services may include physiotherapy, orientation and mobility instructors,
exercise programs, case management, optometry or ophthalmology.

Cost
There is no direct service fee to clients.

Who is eligible?
This specialised service is suited to people living in the community with vision loss that
is impacting on functional tasks and appears to be their main concern regarding falls
risk.

How do I refer to this service?
Referrals can be made with consent by a health professional or members of the
public.

To book an appointment contact:
Guide Dogs SA.NT
251 Morphett Street
Adelaide, SA 5000
Tel: Your Support Line: 1800 757-738
E: yoursupportline@guidedogs.org.au
Fax: (08) 8203 8332
Website: www.guidedogs.org.au
**Royal Society for the Blind, Smithfield**

**What is it?**
This service offers assessment by an Occupational Therapist in the client’s home to address and reduce vision related falls risks. Mobility training with an Orientation and Mobility instructor may also be available.

**Cost**
This is a free service

**Who is eligible?**
Individuals living in the Northern suburbs who have an eye conditions diagnosed by optometrist or ophthalmologist, and are at risk of falling.

**How do I refer to this service?**
Contact Royal Society for the Blind  
27 Anderson Walk, Smithfield 5114  
Tel: 8417 5690  
Website: [www.rsb.org.au/](http://www.rsb.org.au/)

---

**Lutheran Homes Incorporated, Glynde**

**What is it?**
This service offers monthly group education and individually tailored goal setting for strategies to reduce risk of falling, related to low vision. The group is facilitated by an Occupational Therapist with focus on falls prevention strategies, related to reduced vision. Individual assessment with the Occupational Therapist is also available.

**Cost**
Small fees do apply. Contact LHI Retirement Services below for more information

**Who is eligible?**
Individuals who are eligible for Community Home Support Program funding via My Aged Care.

**How do I refer to this service?**
All referrals are via My Aged Care  
Tel: 1800 200 422  
Or, contact  
LHI Retirement Services  
24 Avenue Road, Glynde  
Tel: (08) 8337 0488
### Continence services

The listed continence health professionals provide an experienced and comprehensive continence assessment for both bladder and bowel with management programs developed and individually orientated to meet each client’s goals.

Policy Directive, Guideline and Toolkit:

The toolkit comprises of:
- Example Terms of Reference (TOR) for a health service’s Fall Prevention Committee
- When and how to do falls risk screening, assessment, care-planning and discharge planning
- Safe use of bed rails
- Reporting a patient fall incident into SLS topic guide
- Reporting a patient fall incident FAQs
- Post fall team review process

See www.sahealth.sa.gov.au/fallsprevention for:
- Falls & injury risk assessment form (MR58)
- The recommended actions
- Falls risk review form (MR58a)
- Falls risk screening form (MR58b)

National Falls Prevention Guidelines:
Preventing Falls and Harm From Falls in older people:
- Best practice Guidelines for Australian Hospitals
- Best practice Guidelines for Australian Residential Aged Care Facilities
- Best practice Guidelines for Australian Community Care.

These are available for download. As with all Commission publications the Commission encourages reproduction of the guidelines provided that ownership is acknowledged and is not for profit.

“Don’t Fall for It. Falls can be prevented!”
For information on how to download or purchase copies of the “Don’t Fall for It. Falls can be prevented” booklet please access the following link: www.sahealth.sa.gov.au/falls
Please note this booklet is also available in Polish, Italian, German & Chinese.

Falls Prevention Service Directories:
These directories provide a comprehensive listing of falls prevention and related programs in the metropolitan Local Health Networks. They are resources for falls health care professionals and consumers and assist consumers/clients to access appropriate falls prevention services when they need them most. They are updated each year and are available electronically through the Local Health Network intranet pages and the Falls Prevention in SA website.

- Fact Sheet 10: New Mums and Bub can fall too
- Are You at Risk of Falling? Self-Screen Check List

Health providers can download posters targeting health professionals or general falls prevention information posters from the following link (see bottom of website): www.sahealth.sa.gov.au/fallsprevention

Falls SA Website:
This site provides a one-stop shop of falls prevention and management information for health professionals, GP’s, over 50’s and carers. The e-learning package for Health Professionals "Prevention of Falls and Harm from Falls" can be viewed at this website: www.fallssa.com.au

Accreditation Resource Guide:
SA Health has developed an Accreditation Resource to support Health Services to implement the National Safety and Quality Health Service Standard 10 – Preventing Falls and Harm from Falls.
It contains a combination of resources (policies, guidelines and tools) developed by SA Health and assists health services in identifying examples of evidence to demonstrate how to meet individual actions.
This can be accessed through the below website, or alternatively contact your local Falls Prevention Service on 1300 0 FALLS (1300 0 32557).
